

RAGUL SHARMA M

Senior Process & Manufacturing Engineer | APQP | PPAP | PFMEA | IATF 16949

Ragulsharma912@gmail.com • +91 6382461650 • Hosur, Tamil Nadu • www.linkedin.com/Ragulsharma

PROFILE

Results-driven Process & Manufacturing Engineer with 4+ years of experience in automotive seating manufacturing. Expertise in APQP, PPAP, AIAG-VDA PFMEA, Control Plans, SPC, MSA, IATF 16949, industrialization, process validation, new product development, manufacturing engineering and continuous improvement. Experienced in leading projects from development through SOP and mass production while coordinating with suppliers and cross-functional teams.

EXPERIENCE

Senior Officer – Process & Manufacturing Engineering

Jun 2022 – Present

Uno Minda Limited – Seating Division

Hosur, TN

Product Development & Industrialization

- ▶ Support prototype builds, pilot trials, production validation, PPAP submission and production readiness.
- ▶ Coordinate engineering changes (ECN/ECR) throughout product development.
- ▶ Prepare manufacturing documentation including Process Flow Diagram, AIAG-VDA PFMEA, Control Plan, Standard Operating Procedures and Work Instructions.
- ▶ Lead manufacturing process development from concept through SOP for automotive interior and seating components.
- ▶ Developed Process Flow Diagrams, PFMEA, Control Plans and Standard Operating Procedures for new product launches.
- ▶ Supported Injection Moulding process validation, manufacturing feasibility studies and process capability improvement.
- ▶ Participated in mould trials, process parameter optimization and production readiness activities.
- ▶ Supported Ultrasonic Welding and adhesive application process validation for assembly operations.
- ▶ Implemented process automation, poka-yoke systems and process controls to improve quality and productivity.
- ▶ Led cross-functional teams in process improvement and complex problem-solving using 8D and Root Cause Analysis.
- ▶ Executed Lean Manufacturing and Kaizen projects resulting in productivity improvement and manufacturing cost reduction.
- ▶ Supported supplier localization activities for cost optimization and supply chain improvement.
- ▶ Prepared equipment specifications, manufacturing layouts and participated in equipment procurement and installation.
- ▶ Performed process and equipment cost estimation for new manufacturing projects.
- ▶ Ensured compliance with IATF 16949 and ISO 14001 requirements.
- ▶ Improved OEE through cycle time reduction, workstation optimization and process standardization.

Supplier Quality & APQP

- ▶ Coordinate with suppliers during new product development and APQP activities.
- ▶ Support supplier PPAP documentation review and production readiness.
- ▶ Participate in supplier quality improvement initiatives and preventive quality planning.
- ▶ Support supplier risk identification through AIAG-VDA risk assessment methodology.
- ▶ Collaborate with suppliers and cross-functional teams to resolve quality issues during product development.

Quality Engineering

- ▶ Conduct Measurement System Analysis (MSA), Gauge R&R, SPC and Process Capability (Cp/Cpk) studies.
- ▶ Interpret engineering drawings, GD&T and customer specifications.
- ▶ Perform process validation and manufacturing readiness verification.
- ▶ Participate in process audits and customer quality reviews.
- ▶ Implement corrective and preventive actions using Root Cause Analysis, CAPA and 8D methodologies.
- ▶ Supported supplier qualification by evaluating manufacturing capability, quality systems, production capacity and APQP readiness during new product development.

Manufacturing Engineering

- Develop AutoCAD manufacturing layouts and optimize workstation design.
- Improve productivity through Lean Manufacturing, Kaizen and line balancing.
- Implement poka-yoke solutions to eliminate manufacturing defects.
- Improve Overall Equipment Effectiveness (OEE) through process optimization.
- Support safe launch activities and production ramp-up.
- Implemented poka-yoke, root cause analysis and continuous improvement projects.

EDUCATION

Master of Business Administration, Business Analytics (Pursuing)

Amity University Online

2025 – 2027

Noida, IN

Bachelor of Engineering – Mechatronics Engineering

Sona College of Technology

2019 – 2022

Salem, TN, IN

CGPA: 8.52

SKILLS

- APQP • PPAP • AIAG-VDA PFMEA • Control Plan • PFD • MSA • SPC • IATF 16949 • Engineering Drawings • GD&T
- Metrology • Inspection Techniques • AutoCAD • Lean Manufacturing • Kaizen • Root Cause Analysis • CAPA • 8D
- Process Validation • Industrialization • Supplier Quality • Production Launch • Power BI • Excel (Advance) • SAP

CORE COMPETENCIES

Automotive Core Tools:

APQP | PPAP | AIAG-VDA PFMEA (7-Step) | Control Plan | Process Flow Diagram | MSA | SPC | 8D Problem Solving
Root Cause Analysis | CAPA

Quality Standards:

IATF 16949 | ISO 9001 | ISO 14001 | AIAG Standards | VDA Methodology (Basic Knowledge) | Process Audit
Layered Process Audit | Safe Launch Plan

Manufacturing :

New Product Development | Process Validation | Industrialization | Production Launch | SOP Readiness | Process
Optimization | Lean Manufacturing | Kaizen | Line Balancing | Work Instructions
Capacity Study

Measurement & Metrology:

Vernier Caliper | Height Gauge | Micrometer | Thread Gauge | Go/No-Go Gauge | Dial Gauge | Torque Tester | Force
Gauge | Vision Inspection | Measurement System Analysis (MSA)

Engineering:

Engineering Drawings | GD&T Interpretation | DFM | Manufacturing Feasibility | Process Design | AutoCAD Layout Design

Software:

AutoCAD | Microsoft Excel (Advance) | Power BI | SAP (Working Knowledge) | MS Office | IoT Development

CERTIFICATIONS

- Certified Automotive Core Tools Engineer (CACTE)– (OMNEX)
- JLPT N5 – Japanese Language Proficiency Test
- Internal IATF Auditor (QMS) – TÜV SÜD South Asia
